https://github.com/JavierYungaT

Full Stack Developer with over three years of experience in software development, focused on building efficient, scalable, high-performance solutions. Specialized in technologies such as Java, Spring Boot, Node.js and Laravel for the backend, Angular and React for the frontend, React Native and Flutter for mobile applications, as well as experience developing enterprise applications using Oracle Forms and Reports integrated with Oracle databases.

Solid knowledge of cloud environments such as AWS and containerization tools such as Docker, as well as relational and NoSQL databases. Also familiar with event-driven architectures to optimize application performance.
Technology enthusiast committed to continuous learning, always seeking new challenges that drive my professional growth. I am motivated to contribute as a developer by adding value, sharing best practices and actively collaborating within teams.

EXPERIENCE

Aliado Contable

Systems \ Telecommunications Engineer — January 2025 – Present

- Generation of dynamic reports and custom PDF files within the document management system, with information displayed on internal dashboards.
- Implementation of containerization with Docker and CI/CD deployment automation using GitHub Actions, enabling continuous delivery on AWS infrastructure.
- Design and implementation of REST APIs for document management, booking control, real-time data synchronization and electronic documentation.
  Tech stack: Python, TypeScript, React (nginx), AWS, Docker, GitHub Actions, PostgreSQL.

La Motora

Software Developer | Full Stack — May 2024 – November 2025

- Development of document management and sports facility booking systems, using Node.js (TypeScript) on the backend and Flutter on the frontend.
- Implementation of push notifications and deployment to Google Play and the App Store, using Docker and AWS.
- **Reduced booking validation time by 30%**, through improvements to availability logic and concurrency locking.
- Generation of custom PDF files for document management, with real-time reports and visual dashboards for internal users.
- Automation of continuous deployment on AWS with Docker containers and GitHub Actions.
  Tech stack: Node.js, TypeScript, Angular, Flutter, MongoDB, AWS, Docker, PDFKit, GitHub Actions, PostgreSQL.

Cooperativa Crea

Service Desk Assistant — February 2024 - May 2024

- Creation and optimization of **SQL queries** in Oracle on the **core banking system**, focused on efficiency and reducing server load.
- User support through **GLPI**, task automation on **Linux** servers, and remote access to critical systems.
- Oracle Forms and Reports for reporting.
- **Improved response time by 25%** by developing a query script to enhance reports.
  Tech stack: Oracle, PL/SQL, Linux, GLPI, SSH, Bash.

Almacenes Juan Eljuri | Liquor Division

Software Developer — March 2023 - February 2024

- Development of enterprise systems with Spring Boot, Laravel and Angular, integrating financial, stock and inventory modules.
- Integration with the SRI (Ecuadorian Tax Authority) for electronic invoicing and credit/debit notes, improving query times by 40% through indexing and advanced pagination.
- Development of bank reconciliations and accounting reports using JasperReports.
- Oracle Forms and Reports for reporting.
- Optimized the processing of large volumes of tax data using Hibernate and stored procedures, reducing wait times in the accounting department.

  Tech stack: Java (Spring Boot), Laravel, Angular, SQL Server, JasperReports, Hibernate, SRI API, Bootstrap, JavaScript, Ajax.

MycodedMind
Frontend / Backend Web Developer — September 2022 - February 2023

- Development of web interfaces with **JavaScript**, **PHP** and **MySQL**, focused on HR and collections.
- Full digitalization of the **debt collection** process, automating records and payment tracking.
- Implementation of a system to **generate employment contracts** that improved HR team productivity by **50%**.
- **Reduced system load time by 35%** through SQL query optimization and cleanup of legacy PHP code.
  Tech stack: JavaScript, PHP, MySQL, Bootstrap, REST API, HTML/CSS.

SKILLS

Programming Languages:
Java (Intermediate) – Robust backend with Spring Boot.
JavaScript (Intermediate) – Web and mobile development.
TypeScript (Intermediate) – Modern applications with Node.js and React.
PHP (Intermediate) – Backend with Laravel and legacy projects.
Python (Basic) – Utility scripts and automation.

Frameworks:
Spring Boot (Intermediate) – REST APIs, security, data management.
Node.js + Express.js (Intermediate) – Microservices and lightweight backends. React.js (Intermediate) – Dynamic interfaces and SPAs.
Flutter (Intermediate) – Cross-platform mobile apps.
Laravel (Intermediate) – Structured PHP backend and system maintenance.

Databases:
SQL Server (Advanced) – Stored procedures, jobs, query optimization.
Oracle (Advanced) – PL/SQL, analysis of financial systems.
PostgreSQL (Advanced) – Advanced data management in microservices.
Redis (Advanced) – Caching and performance optimization.
MySQL (Intermediate) – Management of legacy systems.
Firebase (Intermediate)

Tools:
Git, GitHub, Jira, Trello, Slack, Zoho, GLPI.

Agile:
Scrum – Collaborative work in cross-functional teams.

Languages:
Spanish – Native.
English – Basic level (technical reading and documentation).

DevOps & Cloud:
Docker – Containers for consistent deployments. AWS (EC2, S3) – Backend hosting and storage. CI/CD – Automation with GitHub Actions.

EDUCATION

Universidad Politécnica Salesiana – Cuenca, Ecuador. Bachelor's Degree in Computer Science Engineering, May 2022.

CERTIFICATIONS

- **Scrum Fundamentals Certified – ScrumStudy. 2019. (Credential ID 747099) Mobile App Development – Google. 2022. (Credential ID D64 Q95 3EW) Cloud Computing – Google. 2022. (Credential ID FSS FSD 9LB)**
- **Big Data & Analytics – CISCO 2020**
- **N8N + MCP: Automation and AI Agents – Udemy. 2025. (Certificate number: UC-0a9119b7-a449-4c18-880a-22c717f26dca)**
- **Java Microservices with Kafka | Spring Boot | Event Sourcing – Udemy. 2025. (Certificate number: UC-23c0f506-020f-4665-a425-02356928a8ee)**
- **Flutter – Mobile: Zero to Expert – Udemy. 2025. (Certificate number: UC-67fd42b8-94f1-4025-ba80-be56d87d1a34)**
- **Spring Framework 6 & Spring Boot 3: Zero to Expert – Udemy. 2025. (Certificate number: UC-49dbc5d4-a36d-4847-aa99-0e76aa68da77)**
